“Tesla Energy Lights™ are a very useful application to use as an amplifier of your intentions. Although it's effective to passively sit and just feel whatever you're feeling, it's more effective to direct this energy. It's providing energy stimulation into your energy system, and you can direct that energy into your visualizations. You can visualize being much better, healthier, stronger, more able to speak your mind. Whatever it is that you're working on, visualize that clearly while this system is operating.”
